

Spa centar

## *Dobrodošli u Spa centar Lago di Spa!*

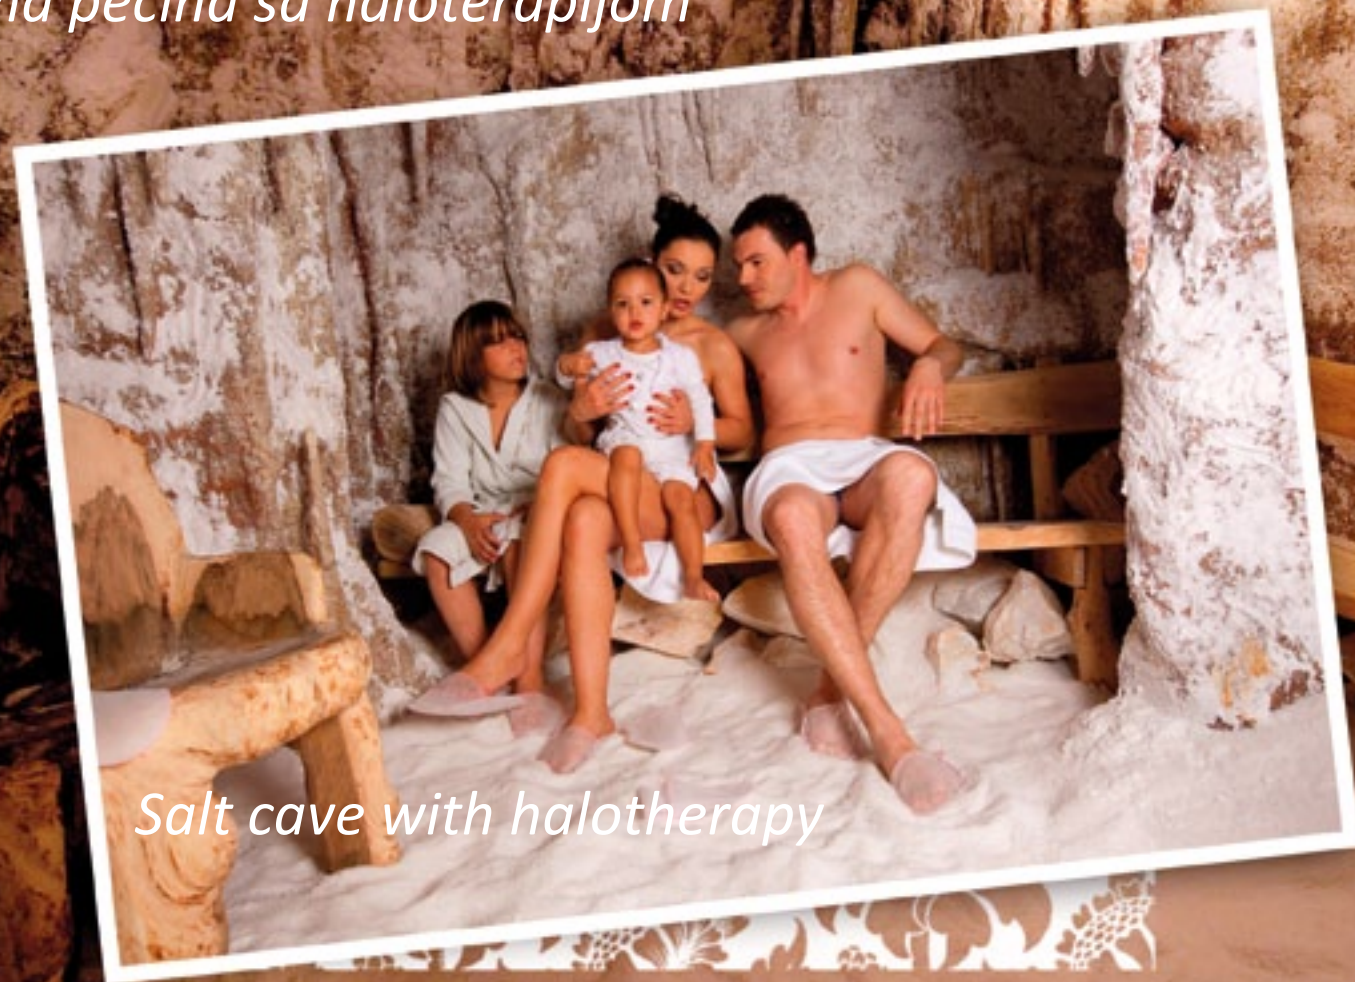

Zaronite u jezero želja i izaberite ono što ćete dugo pamtiti i što će Vas uvek vraćati nama. Kreirali smo za Vas SPA sa najbogatijim sadržajem na Balkanu i nepresušnim izvorom novih usluga.

## *Welcome to Spa Centre Lago di Spa!*

Dive into the „Lake of Desire“ and choose something that You will remember forever. You will always want to come back for more. We have created a SPA for You with the richest content in the Balkans and an inexhaustible source of new services.

## *Slana pećina sa haloterapijom*

*Salt cave with halotherapy*

## **SLANA PEĆINA SA HALOTERAPIJOM**

Slana pećina je imitacija prirodne slane pećine s njenom lekovitom mikroklimom. Vazduh je zasićen suvim, raspršenim, najfinijim česticama kamene soli.

Potvrđeno je da ima izvrstan terapijski uticaj u lečenju astme i bronhitisa, smiruje i produbljuje disanje, ubrzava kretanje disajnog epitela i čisti disajne puteve, deluje protiv upala i prehlada, protiv alergija, hroničnih infekcija, kožnih problema i stresa, ubrzava oksidaciju serotonina, reguliše mineralnu uravnoteženost.

Jedan tretman u slanoj pećini zamenjuje četiri dana boravka na moru. Tretman za odrasle traje 40 minuta, a za decu 20 minuta.

## **SALT CAVE WITH HALOTHERAPY**

Our Salt Cave is an imitation of a natural salt cave with its healing microclimate. The atmosphere is saturated with dry air, the floor is covered with the finest particles of rock salt.

It has been confirmed to have excellent therapeutic effect in treating asthma and bronchitis, soothing and deepens breathing, speeds up the movement of respiratory epithelium and cleans the airways. Acting as an anti-inflammatory and anti-allergen, against chronic infections, skin problems and stress, it also accelerates the oxidation of serotonin and regulates mineral balance.

One treatment in the salt cave replaces the four days spent by the sea side. Treatments for adults take 40 minutes and for children 20 minutes.

# Spa essence

**IR SAUNA** - Emitovanjem IR zraka postiže se dubinsko zagrevanje tkiva na normalnoj temperaturi prostorije. IR zraci imaju i baktericidno dejstvo što posebno pogoduje aknama i upalnim procesima na koži. Infracrveni zraci zagrevaju organizam iznutra ka spolja što uslovljava izlučivanje štetnih produkata kroz kožu bez neprijatno visoke temperature.

**INFRARED SAUNA** - Broadcasting of IR rays causes the heating of deep tissue at normal room temperature. IR rays also have an anti-bactericidal effect which is especially suitable for acne and skin inflammatory processes. The infrared rays heat up the body from the inside to the outside, which causes the secretion of harmful products through the skin without uncomfortable high temperature.

**PARNO KUPATILO** - Vlažna para u parnom kupatilu stimuliše protok krvi i intenzivno čisti kožu otvarajući pore, otklanja odumrle slojeve kože i ostavlja kožu mekanom, čistom i svilenkasto nežnom. Parno kupatilo je idealno za osobe koje pate od: poremećaja u spavanju, preteranog umora, oslabljene cirkulacije kože, suve i napukle kože, napetih i oslabljenih mišića. Parna terapija redukuje znakove stresa i umora, stoga vaš izgled čini mlađim i lepšim.

**STEAM BATH** - Steam stimulates blood flow and intensively cleans the skin by opening the pores, removing dead layers of the skin and leaves it soft, clean and silky. Steam bath is effective for people suffering from: sleeping disorder, excessive fatigue, impaired circulation of the skin, dry and cracked skin, tense muscles and weakness. Steam treatment reduces signs of stress and fatigue, therefore make you look younger and prettier.

**TEPIDARIJUMI SA SIROVIM VULKANSKIM KAMENJEM** - Toplo kamenje je odličan akumulator toplote i prenosilac energije, a vulkansko kamenje ima i određena geomagnetska svojstva pa samim tim ove anatomske grejne ležaljke imaju terapijsko dejstvo na organizam.

**TEPIDARIUM WITH VOLCANIC STONES** - Heated stones accumulate heat excellently, transmitting energy through the body, while the volcanic stones which have certain geomagnetic properties contribute to balance of the mind and body. These anatomical heating chairs have a therapeutic effect on the whole body.

U Spa centru Lago di Spa možete uživati u tradicionalnim masažama iz raznih krajeva sveta.

THAI MASSAGE WITH AROMATIC OILS – Deeply relaxing massage.

SPICY BAMBOO – Tretman sa pilingom od narandže i masažom sa ekstraktom bambusa.

SPICY BAMBOO – Treatment with orange exfoliator and massage with bamboo extract.

\*Tajlandski rituali se izvode od strane eksperata sa Tajlanda.

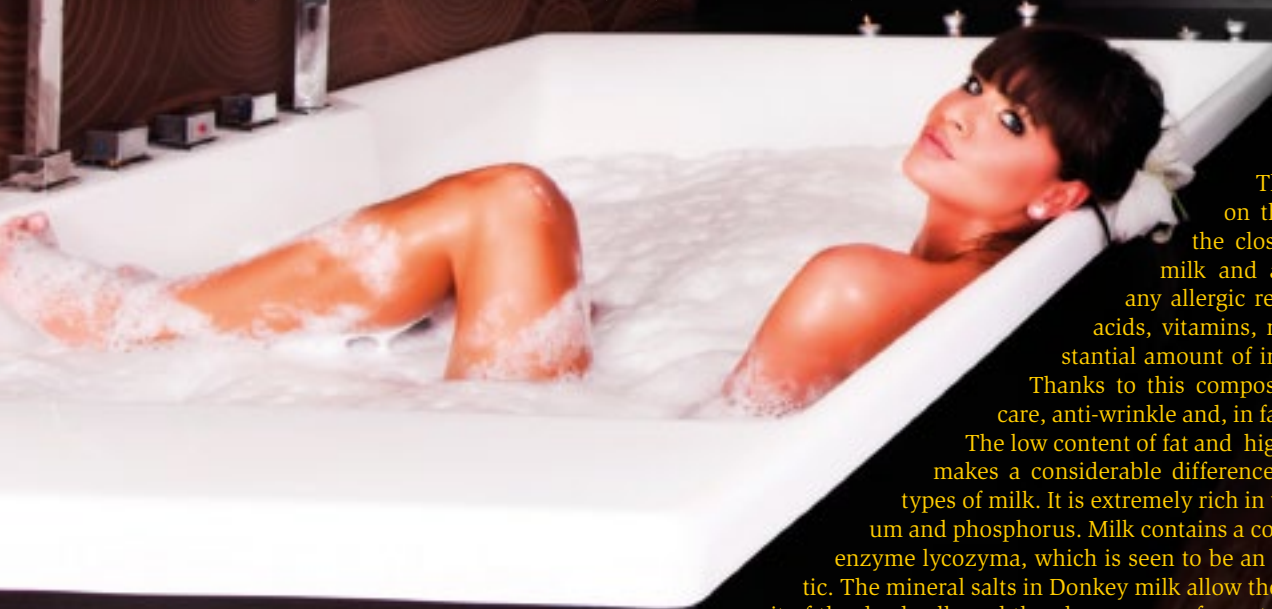

\*Thai rituals are performed by Thai experts.

*Tajlandski rituali*  
*Thai rituals*

## KUPANJE U MAGAREĆEM MLEKU

Dejstvo magarećeg mleka na kožu je višestruko. Po svom sastavu je najbliži ljudskom majčinom mleku i kao takvo ne izaziva alergijske reakcije. Sadrži masne kiseline, vitamine, mineralne soli, znatnu količinu proteina imunoglobulina. Zahvaljujući takvom sastavu odlično je za negu kože, protiv bora i zapravo je prirodni zatezač kože. Nizak sadržaj masti i izuzetno visok sadržaj proteina je ono što čini znatnu razliku u odnosu na druge vrste mleka. Bogato je vitaminima A, C, D i E, kalcijumom i fosforom. Sadrži znatnu količinu enzima lycozima, koji se može okarakterisati kao odličan prirodni antibiotik. Mineralne soli u magarećem mleku omogućavaju koži da bude čista, oslobađajući je mrtvih ćelija, čime se ostavlja prostor za jače dejstvo korisnih sastojaka u dubini. Lipidi obezbeđuju koži dobru ishranjenost i upijanje vitamina, povećavaju elastičnost i služe kao prevencija pojave ekcema i psorijaze.

## DONKEY MILK BATH

The effect of Donkey milk on the skin is complex. It is the closest to human mother's milk and as such does not cause any allergic reactions. It contains fatty acids, vitamins, mineral salts, and a substantial amount of immunoglobulin proteins. Thanks to this composition it is great for skin care, anti-wrinkle and, in fact, is a natural skin lifter. The low content of fat and high protein content is what makes a considerable difference in comparison to other types of milk. It is extremely rich in vitamins A, C, D, E, calcium and phosphorus. Milk contains a considerable amount of the enzyme lycozima, which is seen to be an excellent natural antibiotic. The mineral salts in Donkey milk allow the skin to be clean, freeing it of the dead cells and thus leaves room for a stronger effect in the depth of useful compounds. Lipids provide good skin nutrition and absorption of vitamins, increase flexibility and serve as a prevention of eczema and psoriasis.

## KUPANJE U VINU

S obzirom na to da je ekstrakt vina bogat bioflavonoidima i vitaminima (posebno vitaminom C), ovi sastojci deluju kao antioksidansi na procese u koži, poboljšavaju mikrocirkulaciju i stimulišu proizvodnju kolagena, sastojka koji daje elastičnost. Tokom tretmana, opuštanju doprinosi i lagana muzika, a užitek se upotpunjuje čašom crnog ili belog vina.

## WINE BATH

Considering that the wine extract is rich in bioflavonoid extract and vitamins (especially vitamin C), these compounds act as antioxidants in the process of the skin, and body as a whole, improving microcirculation and stimulating the production of collagen, an ingredient that gives elasticity. During the treatment we contribute to your relaxation with light music, and the peak of your full enjoyment is completed with a glass of red or white wine in the atmosphere of the Roman times.
